

Carl E. Mosley WØFQY 1902-1986 - OOTC 480 Spark operator 9BOJ 1918 St Louis, MO -An Iowa State College grad in 1926, employed by Union Electric St. Louis then W.M. Matthews Corp. Member of IEEE, Intl. Brotherhood of Magicians, Mount City Radio Amateurs and OOTC. Mosley begins business in the early 40s making tube socket adapters, within a few months operated from the Mosley basement, increased to the point where outside help was needed to tem the flood of orders.

Founder of the Vest Pocket Beam, CM1 receiver two years in development, Scotch Master Beams, affectionately known as the Old Man. Saying "Command your band, Mosley Slogan, Power Master full size monoband yagis! Friends these antennas were not the Miami "Gothams."

Carl got his ticket in the spark days in 1918, then the counterpoise, an unwieldy maze of wires had been conceived as a most advanced ground system. Not today, the TA-33-M and other ham antennas created by Mosley Electronics Inc. Are the Dx'ers dream.

They produced for the public resulting the need for TV installation accessories from the late 1940s onward. In 1951 Mosley began manufacturing the famous "Vest pocket" ham antenna. Later military and industrial antennas such as the WWV antenna for receiving time signals were developed adding another line to the already growing list of products. About 1955, the "Trap Master TA33" beams were introduced becoming the standard by which tri-bander beams would be measured. - The antenna line eventually widened to CB and commercial antennas.

Carl was a friendly active ham operator from day one and answered the QSL card fad 100% for which Bob Green has a keep sake in his files. The Mosley CM1 receiver is considered now a rare item and has a very interesting lineup of 6AW8A's on a steel chassis. The Mosley products continue on to this very day.

The OM enjoyed magic and fishing. Material by Mosley dot com and www.w8jyz.com Card collection.

Added 2018 9BOJ 1923 front and rear.

Radio 8CFQ *Easy to read* Ames, Iowa
Nov. 20, 1923

Ur CW sigs were wrked hr yesterday morning.
 U are QSA and QRB hr. QSB in RAC. ~~QAN~~ Ok.
 Transmitter hr consists of 5 watts using the
 LDH ckt with 600 on plate and 7.5 on fil. RAC
 Radiation hr is abt 1.4 to 1.5 amps HW. Rec.
 hr consist of a single ckt using detector and
 two step bt I was using the detector only when
 I communicated with you. Aerial hr is a four
 wire flat top with a four wire fan counterpoise.
 My best DX at this time is 51R, 8aje, 9apf
 I am sure gld to wrk you CW and gld to QSR ani
 time. ~~I should like a QSL fm U by erd giving
 me a rept on mi sigs.~~ Best 73's

*Recd ur cd, om minitax,
 sure gld to know hw I get Carl C, Mosley
 sum in there. Excise late QSL 207 East ave,*
